

Autism Society of Minnesota Website and Social Media Posting Policy

The Autism Society of Minnesota exists to enhance the lives of individuals with autism spectrum disorders. AuSM seeks to realize its mission through education support, collaboration, and advocacy.

In line with our mission, AuSM will share and promote events and information to the autism community through the AuSM website, www.ausm.org, Facebook page, YouTube Channel and other social media, provided that the events and information share our philosophy and support our goals:

- Inform and educate families, professionals, and the community about autism spectrum disorders and promising interventions that meet individual needs.
- Advocate for appropriate services and rights for people with ASD and their families.
- Support families and individuals through services and relationships.
- Do not directly conflict with AuSM events and/or information.

If the above criteria are met, we will consider posting information as space allows. The length of time events and information are shared through AuSM's website and social media is at the discretion of AuSM. AuSM is not responsible for reproductions of information taken from AuSM's website and/or social media once the information is posted. AuSM reserves the right to remove or edit events and/or information from its website and/or social media without notice.
