

# Noel Lab -- Paid Study!

Purpose: Better understand **sensory processing** in neurotypical individuals, as well as those on the **autism spectrum**.

What will I be asked to do?

- Observe a series of **visual flashes** and **auditory beeps**
- Answer questions regarding the stimuli
- Wear an **EEG** cap (see image) that measures brain activities

Who is eligible?

- **12-36** years old
- No history of epilepsy
- Able to sit quietly and make judgment of sensory stimuli
- Participants diagnosed with **Autism** are welcome!

Duration and Compensation:

- **2** hours for one session
- You are welcome to participate in up to **4** sessions
- You will be compensated with **\$30/hour**
- If you complete all **4** sessions, you will receive **\$60 bonus (a total of \$300)!**
